**PRESS RELEASE
FOR IMMEDIATE RELEASE**

**GHANA'S GENERATION CAPACITY ENOUGH TO MEET PEAK DEMAND;
MINORITY'S CALL FOR LOAD MANAGEMENT TIME TABLE MISPLACED.**

Accra, Ghana – Our attention has been drawn to a press conference held by the Minority in Parliament demanding a publication of a load management time table.

It is instructive to note that as a country, our current power supply capacity is adequate to meet existing demand, even during peak hours.

Whilst acknowledging that we inherited an extremely challenged distribution system, the government and the power sector players continue to take the needed steps to permanently resolve these challenges.

The current power generation capacity is sufficient to meet peak demand; hence there is no basis for a load-shedding timetable at this time. The Government remains committed to the consistent provision of electricity to the Ghanaian people.

Signed:

**RICHMOND ROCKSON, ESQ.
